To Whom It May Concern,

I am writing this to recommend Gurvansh for the Master's program in Computer Science at your esteemed university. I was his supervisor during his summer internship, as well as his course instructor for 'Compiler Design' and 'Data Structures and Algorithms' in his 6th and 3rd semesters, respectively.

Throughout our interaction, I have been impressed by his work ethic and commitment. Even though he had limited time to prepare for his semester exams after he changed his major to CSE, he still managed to score the highest marks among his peers, showcasing his dedication to learning and working hard.

During the tenure of his research internship, he was involved in building a CNN for anemia detection using medical images. He managed databases, fine-tuned the model, and showed a keen interest in grasping complex concepts. He also demonstrated strong leadership and teamwork skills during his internship and exhibited effective time management.

His contributions to the project have been substantial. I believe he is a hardworking and talented individual, and I am confident that his strong technical background, coupled with his passion for technology, makes him a strong candidate for your course. He will undoubtedly bring valuable insights and enthusiasm to your program. Please feel free to contact me for any additional information or clarification.

Sincerely,

Dr. Akashdeep Sharma

Assistant Professor UIET, Panjab University
